## INTRODUCTION

In the United States, nearly two-thirds of all deaths among young people aged 10–14 years result from only five causes: motor-vehicle crashes (23.4%), other unintentional injuries (15.7%), cancer (12.5%), suicide (7.2%), and homicide (5.2%). Substantial morbidity and social problems also result from the approximately 20,000 pregnancies and 7,000 live births that occur annually among girls younger than aged 15 years and the approximately 500,000 new cases of sexually transmitted diseases (STDs) reported among youth aged 10–19.2,3 Among adults aged 25 or older, 58% of all deaths in the United States result from cardiovascular diseases (34%) and cancer (24%).4

Across all age groups in the United States, the leading causes of illness and death are related to the following behaviors:

- Risk behaviors that contribute to unintentional injuries and violence.
- Tobacco use.
- Alcohol and other drug use.
- Sexual behaviors that contribute to unintended pregnancy and STDs, including human immunodeficiency virus (HIV) infection.
- Unhealthy dietary behaviors.
- Physical inactivity (and overweight).

These behaviors are frequently interrelated and are often established during youth and persist into adulthood.

To monitor priority health-risk behaviors among adolescents and young adults in each of these six categories, the Centers for Disease Control and Prevention (CDC) established the Youth Risk Behavior Surveillance System (YRBSS).<sup>5</sup> The YRBSS includes national, state, and local school-based surveys of high school students in grades 9–12. In addition, some states and cities conduct a school-based Youth Risk Behavior Survey (YRBS) among middle school students. In 2005, 10 states and 11 cities conducted a middle school YRBS.

This report summarizes results from five state and eight local middle school surveys with weighted data in 2005. With the exception of one local survey (San Francisco) conducted during fall 2004, all weighted surveys were conducted during spring 2005. Data from the five state and two local school-based surveys with unweighted data are not included in this report.

## METHODOLOGY

### QUESTIONNAIRE DEVELOPMENT

The middle school YRBS questionnaire is modeled on the high school YRBS questionnaire and is designed to determine the prevalence of health-risk behaviors among middle school students. The topics covered on the middle school questionnaire include student demographics, body mass index (BMI) (calculated using self-reported height and weight), risk behaviors related to unintentional injury and violence, suicide ideation and attempts, tobacco use, drug and alcohol use, sexual risk behaviors, weight control behavior, and physical activity (see Appendix). Questions about fruit, vegetable, and milk consumption, which are included on the high school questionnaire, are not included on the middle school questionnaire because of the complexity of the response options. Given the low prevalence of most risk behaviors among middle school students, the time frame used to measure behaviors related to unintentional injuries and violence, suicide ideation and attempts, alcohol and other drug use, and sexual behaviors is limited to lifetime rather than past 12 months or past 30 days. To meet their needs, sites may modify this questionnaire by adding or deleting questions. CDC provides each site with a camera-ready copy of the questionnaire along with computer-scannable answer sheets.

### SAMPLING

In 2005, each state and local school-based middle school YRBS employed a two-stage cluster sample design to produce representative samples of students in middle schools in its jurisdiction. Three states (Georgia, South Carolina, and Wyoming) and seven cities (District of Columbia, Hillsborough County, Memphis, Miami, Milwaukee, San Bernardino, and San Francisco) conducted a YRBS in grades

6, 7, and 8. Two states (Maine and North Dakota) conducted a YRBS in grades 7 and 8. One city (Dallas) conducted a YRBS only in grade 8.

In five states (Georgia, Maine, North Dakota, South Carolina, and Wyoming) and two cities (Memphis and Milwaukee), schools were selected with probability proportional to school enrollment size. In the six other cities (Dallas, District of Columbia, Hillsborough County, Miami, San Bernardino, and San Francisco), all schools with any of the appropriate middle school grades were selected. At the second sampling stage, intact classes of a required subject (e.g., English) or intact classes during a required period (e.g., second period) were selected randomly in all sites. All students in selected classes were eligible to participate in the survey.

In 2005, the student sample sizes for the weighted state and local middle school YRBS ranged from 1,079 to 2,906. School response rates ranged from 73% to 100%, student response rates ranged from 76% to 92%, and overall response rates ranged from 63% to 86% (Table 1). The school response rate multiplied by student response rate produces the overall response rate for each site. The five state and eight local surveys included in this report had an overall response rate of 60% or more, as well as appropriate documentation to allow the data to be weighted. Thus, the data are considered representative of students in specified grades in each jurisdiction.

### DATA COLLECTION

Survey procedures for the state and local surveys were designed to protect students' privacy by allowing for anonymous and voluntary participation. Students completed the self-administered questionnaire during a single class period and recorded their responses directly on a computer-scannable answer sheet. The core questionnaire contained 49 multiple-choice questions. To meet state or local data needs, five states (Georgia, Maine, North Dakota, South Carolina, and Wyoming) and five cities (Dallas, Hillsborough County, Memphis, Milwaukee, and San Francisco) added or deleted some questions. Before the survey was administered, local parental permission procedures were followed.

### DATA ANALYSIS

Each data set was cleaned and edited for inconsistencies. Missing data were not statistically imputed. The number of completed questionnaires that failed quality-control\* checks and were excluded from state and local survey analysis ranged from 0 to 54 across states (median: 3) and from 2 to 15 across cities (median: 7).

Respondents were classified as being at risk for becoming overweight or being overweight on the basis of self-reported height and weight data, using reference data from CDC growth charts.<sup>6</sup> At risk for becoming overweight was defined as having a BMI of ≥85th percentile and <95th percentile for age and sex. Overweight was defined as having a BMI of ≥95th percentile for age and sex. A BMI of ≥95th percentile for age and sex among young people is approximately equivalent to a BMI ≥30 among adults. For an adult, a BMI of 30 is approximately 30 pounds overweight.

SAS® and SUDAAN® software were used to compute prevalence estimates and confidence intervals for all variables and all data sets.<sup>7,8</sup> Medians and ranges are presented for states and cities by grade.

<sup>\*</sup>A questionnaire that fails quality control has <20 remaining responses after editing or has the same answer to ≥15 questions in a row.

### RESULTS

## BEHAVIORS THAT CONTRIBUTE TO UNINTENTIONAL INJURIES

### Seat Belt Use

Across states, the percentage of students who rarely or never wore a seat belt when riding in a car ranged as follows:

- 6th grade: 9.2% to 11.6% (median: 10.6%) (Tables 2a, 2d, 2e)
- 7th grade: 6.9% to 12.5% (median: 10.1%) (Tables 2a–2e)
- 8th grade: 9.5% to 16.7% (median: 11.4%) (Tables 2a–2e)

Across cities, the percentage of students who rarely or never wore a seat belt when riding in a car ranged as follows:

- 6th grade: 3.3% to 18.6% (median: 9.7%) (Tables 2g–2m)
- 7th grade: 6.7% to 18.1% (median: 13.0%) (Tables 2g–2m)
- 8th grade: 8.9% to 26.5% (median: 13.4%) (Tables 2f–2m)

### Rode with a Driver Who Had Been Drinking Alcohol

Across states, the percentage of students who ever rode in a car driven by someone who had been drinking alcohol ranged as follows:

- 6th grade: 25.3% to 28.3% (median: 26.8%) (Tables 2a, 2d, 2e)
- 7th grade: 27.8% to 35.2% (median: 31.6%) (Tables 2a, 2b, 2d, 2e)
- 8th grade: 33.1% to 42.8% (median: 40.0%) (Tables 2a, 2b, 2d, 2e)

Across cities, the percentage of students who ever rode in a car driven by someone who had been drinking alcohol ranged as follows:

- 6th grade: 11.9% to 28.2% (median: 24.1%) (Tables 2g–2m)
- 7th grade: 18.9% to 37.7% (median: 29.6%) (Tables 2g–2m)
- 8th grade: 26.1% to 54.5% (median: 37.2%) (Tables 2f–2m)

### Bicycle Helmet Use

Across states, among students who rode bicycles, the percentage who rarely or never wore a bicycle helmet ranged as follows:

- 6th grade: 65.7% to 79.2% (median: 69.6%) (Tables 3a, 3d, 3e)
- 7th grade: 46.4% to 86.1% (median: 77.8%) (Tables 3a–3e)
- 8th grade: 54.2% to 89.6% (median: 78.0%) (Tables 3a–3e)

Across cities, among students who rode bicycles, the percentage who rarely or never wore a bicycle helmet ranged as follows:

- 6th grade: 39.8% to 85.1% (median: 75.3%) (Tables 3g–3m)
- 7th grade: 53.3% to 92.1% (median: 82.1%) (Tables 3g–3m)
- 8th grade: 61.2% to 96.0% (median: 87.8%) (Tables 3f–3m)

### Rollerblade or Skateboard Helmet Use

Across states, among students who rollerbladed or rode a skateboard, the percentage who rarely or never wore a helmet ranged as follows:

- 6th grade: 66.8% to 73.4% (median: 68.5%) (Tables 3a, 3d, 3e)
- 7th grade: 57.2% to 82.3% (median: 75.7%) (Tables 3a, 3b, 3d, 3e)
- 8th grade: 69.2% to 84.9% (median: 77.2%) (Tables 3a, 3b, 3d, 3e)

Across cities, among students who rollerbladed or rode a skateboard, the percentage who rarely or never wore a helmet ranged as follows:

- 6th grade: 35.6% to 89.3% (median: 72.7%) (Tables 3g–3m)
- 7th grade: 55.2% to 91.3% (median: 82.8%) (Tables 3g–3m)
- 8th grade: 60.4% to 93.3% (median: 88.7%) (Tables 3f–3m)

## BEHAVIORS THAT CONTRIBUTE TO VIOLENCE

### Carried a Weapon

Across states, the percentage of students who ever carried a weapon (e.g., a gun, knife, or club) ranged as follows:

- 6th grade: 30.3% to 49.6% (median: 33.2%) (Tables 4a, 4d, 4e)
- 7th grade: 32.7% to 48.1% (median: 36.8%) (Tables 4a, 4b, 4d, 4e)

• 8th grade: 39.4% to 54.3% (median: 42.6%) (Tables 4a, 4b, 4d, 4e)

Across cities, the percentage of students who ever carried a weapon (e.g., a gun, knife, or club) ranged as follows:

- 6th grade: 18.0% to 29.1% (median: 24.1%) (Tables 4g–4l)
- 7th grade: 20.6% to 35.8% (median: 32.3%) (Tables 4g–4l)
- 8th grade: 27.2% to 43.9% (median: 37.8%) (Tables 4f–41)

### In a Physical Fight

Across states, the percentage of students who ever were in a physical fight ranged as follows:

- 6th grade: 48.2% to 57.4% (median: 56.5%) (Tables 4a, 4d, 4e)
- 7th grade: 50.4% to 62.8% (median: 57.2%) (Tables 4a, 4b, 4d, 4e)
- 8th grade: 56.4% to 69.0% (median: 60.7%) (Tables 4a, 4b, 4d, 4e)

Across cities, the percentage of students who ever were in a physical fight ranged as follows:

- 6th grade: 47.4% to 73.1% (median: 56.0%) (Tables 4g–4l)
- 7th grade: 54.9% to 74.4% (median: 65.5%) (Tables 4g–4l)
- 8th grade: 63.3% to 80.6% (median: 71.1%) (Tables 4f–41)

### Hurt in a Physical Fight

Across states, the percentage of students who ever were hurt in a physical fight and had to be treated by a doctor or nurse ranged as follows:

- 6th grade: 5.3% to 8.0% (median: 6.9%) (Tables 4a, 4d, 4e)
- 7th grade: 6.9% to 8.1% (median: 7.6%) (Tables 4a, 4b, 4d, 4e)
- 8th grade: 6.2% to 9.7% (median: 7.1%) (Tables 4a, 4b, 4d, 4e)

Across cities, the percentage of students who ever were hurt in a physical fight and had to be treated by a doctor or nurse ranged as follows:

- 6th grade: 5.3% to 7.9% (median: 6.6%) (Tables 4g–4m)
- 7th grade: 2.6% to 9.8% (median: 6.7%) (Tables 4g–4m)
- 8th grade: 5.2% to 11.2% (median: 7.5%) (Tables 4f–4m)

### Seriously Thought About Killing Themselves

Across states, the percentage of students who ever seriously thought about killing themselves ranged as follows:

- 6th grade: 14.9% to 22.7% (median: 16.5%) (Tables 5a, 5d, 5e)
- 7th grade: 16.0% to 23.7% (median: 22.1%) (Tables 5a, 5b, 5d, 5e)
- 8th grade: 22.3% to 26.0% (median: 23.4%) (Tables 5a, 5b, 5d, 5e)

Across cities, the percentage of students who ever seriously thought about killing themselves ranged as follows:

6th grade: 14.0% to 23.5% (median: 20.5%)
 (Tables 5g–5m)

- 7th grade: 16.0% to 24.5% (median: 21.0%)
   (Tables 5g-5m)
- 8th grade: 17.5% to 30.5% (median: 22.8%) (Tables 5f–5m)

### Made a Plan About How to Kill Themselves

Across states, the percentage of students who ever made a plan about how they would kill themselves ranged as follows:

- 6th grade: 9.3% to 15.3% (median: 10.6%) (Tables 5a, 5d, 5e)
- 7th grade: 10.2% to 18.1% (median: 12.8%) (Tables 5a, 5b, 5d, 5e)
- 8th grade: 12.8% to 17.7% (median: 15.0%) (Tables 5a, 5b, 5d, 5e)

Across cities, the percentage of students who ever made a plan about how they would kill themselves ranged as follows:

- 6th grade: 6.4% to 12.3% (median: 10.9%) (Tables 5g–5m)
- 7th grade: 9.7% to 15.1% (median: 12.2%) (Tables 5g–5m)
- 8th grade: 6.3% to 18.7% (median: 14.8%) (Tables 5f–5m)

### Tried to Kill Themselves

Across states, the percentage of students who ever tried to kill themselves ranged as follows:

- 6th grade: 4.2% to 7.8% (median: 6.3%) (Tables 5a, 5d, 5e)
- 7th grade: 5.0% to 10.1% (median: 8.9%) (Tables 5a, 5b, 5d, 5e)
- 8th grade: 6.9% to 11.6% (median: 9.6%) (Tables 5a, 5b, 5d, 5e)

Across cities, the percentage of students who ever tried to kill themselves ranged as follows:

- 6th grade: 3.6% to 10.5% (median: 7.4%)
   (Tables 5g–5m)
- 7th grade: 7.8% to 12.3% (median: 10.5%) (Tables 5g–5m)
- 8th grade: 8.2% to 14.0% (median: 10.2%) (Tables 5f–5m)

### TOBACCO USE

### Lifetime Cigarette Use

Across states, the percentage of students who ever tried cigarette smoking, even one or two puffs (i.e., lifetime cigarette use) ranged as follows:

- 6th grade: 16.1% to 23.7% (median: 19.9%) (Tables 6a, 6e)
- 7th grade: 20.4% to 33.0% (median: 27.2%) (Tables 6a–6c, 6e)
- 8th grade: 29.6% to 37.7% (median: 37.3%) (Tables 6a–6c, 6e)

Across cities, the percentage of students who ever tried cigarette smoking, even one or two puffs (i.e., lifetime cigarette use) ranged as follows:

- 6th grade: 9.2% to 34.0% (median: 18.9%) (Tables 6g–6m)
- 7th grade: 21.2% to 38.9% (median: 33.3%) (Tables 6g–6m)
- 8th grade: 24.8% to 54.6% (median: 37.7%)
   (Tables 6f–6m)

### Lifetime Daily Cigarette Use

Across states, the percentage of students who ever smoked at least one cigarette every day for 30 days (i.e., lifetime daily cigarette use) ranged as follows:

- 6th grade: 2.0% to 2.9% (median: 2.5%) (Tables 6a, 6e)
- 7th grade: 3.3% to 4.9% (median: 3.3%) (Tables 6a–6c, 6e)
- 8th grade: 7.0% to 7.7% (median: 7.1%) (Tables 6a–6c, 6e)

Across cities, the percentage of students who ever smoked at least one cigarette every day for 30 days (i.e., lifetime daily cigarette use) ranged as follows:

- 6th grade: 1.0% to 2.7% (median: 2.6%) (Tables 6g–6l)
- 7th grade: 2.4% to 4.9% (median: 2.5%) (Tables 6g–6l)
- 8th grade: 2.0% to 5.9% (median: 3.2%) (Tables 6f–61)

### Current Cigarette Use

Across states, the percentage of students who smoked cigarettes on 1 or more of the 30 days preceding the survey (i.e., current cigarette use) ranged as follows:

- 6th grade: 3.5% to 3.7% (median: 3.6%) (Tables 7a, 7e)
- 7th grade: 5.8% to 8.2% (median: 6.8%) (Tables 7a–7c, 7e)
- 8th grade: 8.8% to 12.7% (median: 10.7%) (Tables 7a–7c, 7e)

Across cities, the percentage of students who smoked cigarettes on 1 or more of the 30 days preceding the survey (i.e., current cigarette use) ranged as follows:

- 6th grade: 1.9% to 7.2% (median: 3.4%) (Tables 7g–7m)
- 7th grade: 4.7% to 9.5% (median: 6.6%) (Tables 7g–7m)
- 8th grade: 5.6% to 16.7% (median: 7.6%) (Tables 7f–7m)

### **Current Frequent Cigarette Use**

Across states, the percentage of students who smoked cigarettes on 20 or more of the 30 days preceding the survey (i.e., current frequent cigarette use) ranged as follows:

- 6th grade: 0.1% to 1.5% (median: 0.8%) (Tables 7a, 7e)
- 7th grade: 1.0% to 2.6% (median: 1.7%) (Tables 7a–7c, 7e)
- 8th grade: 2.5% to 4.0% (median: 2.8%) (Tables 7a–7c, 7e)

Across cities, the percentage of students who smoked cigarettes on 20 or more of the 30 days preceding the survey (i.e., current frequent cigarette use) ranged as follows:

- 6th grade: 0.0% to 1.4% (median: 0.6%) (Tables 7g–7m)
- 7th grade: 0.0% to 3.5% (median: 0.8%) (Tables 7g–7m)
- 8th grade: 0.6% to 3.4% (median: 1.2%) (Tables 7f–7m)

#### Current Smokeless Tobacco Use

Across states, the percentage of students who used smokeless tobacco (e.g., chewing tobacco, snuff, or dip) on 1 or more of the 30 days preceding the survey (i.e., current smokeless tobacco use) ranged as follows:

- 6th grade: 3.6% to 4.8% (median: 4.2%) (Tables 8a, 8e)
- 7th grade: 3.5% to 5.8% (median: 4.0%) (Tables 8a–8c, 8e)
- 8th grade: 4.3% to 8.0% (median: 6.5%) (Tables 8a–8c, 8e)

Across cities, the percentage of students who used smokeless tobacco (e.g., chewing tobacco, snuff, or dip) on 1 or more of the 30 days preceding the survey (i.e., current smokeless tobacco use) ranged as follows:

- 6th grade: 2.3% to 6.9% (median: 3.2%) (Tables 8g–8l)
- 7th grade: 2.6% to 7.2% (median: 5.0%) (Tables 8g–8l)
- 8th grade: 2.5% to 5.6% (median: 3.6%) (Tables 8f–81)

### **Current Cigar Use**

Across states, the percentage of students who smoked cigars, cigarillos, or little cigars on 1 or more of the 30 days preceding the survey (i.e., current cigar use) ranged as follows:

- 6th grade: 3.7% (Table 8a)
- 7th grade: 2.3% to 4.7% (median: 4.7%) (Tables 8a–8c)
- 8th grade: 5.3% to 6.0% (median: 5.5%) (Tables 8a–8c)

Across cities, the percentage of students who smoked cigars, cigarillos, or little cigars on 1 or more of the 30 days preceding the survey (i.e., current cigar use) ranged as follows:

- 6th grade: 3.5% to 7.5% (median: 6.1%) (Tables 8g–8l)
- 7th grade: 6.7% to 12.7% (median: 7.8%) (Tables 8g–8l)
- 8th grade: 6.3% to 18.0% (median: 8.7%) (Tables 8f–8l)

### Current Tobacco Use

Across states, the percentage of students who smoked cigarettes or cigars or used chewing tobacco, snuff, or dip on 1 or more of the 30 days preceding the survey (i.e., current tobacco use) ranged as follows:

- 6th grade: 6.0% (Table 8a)
- 7th grade: 7.4% to 10.1% (median: 8.0%) (Tables 8a–8c)
- 8th grade: 12.6% to 15.2% (median: 14.4%) (Tables 8a–8c)

Across cities, the percentage of students who smoked cigarettes or cigars or used chewing tobacco, snuff, or dip on 1 or more of the 30 days preceding the survey (i.e., current tobacco use) ranged as follows:

- 6th grade: 5.2% to 13.6% (median: 9.0%) (Tables 8g–8l)
- 7th grade: 10.6% to 13.1% (median: 11.3%) (Tables 8g–8l)
- 8th grade: 9.1% to 22.6% (median: 14.8%) (Tables 8f–81)

### ALCOHOL AND OTHER DRUG USE

#### Lifetime Alcohol Use

Across states, the percentage of students who ever had a drink of alcohol (other than a few sips) (i.e., lifetime alcohol use) ranged as follows:

- 6th grade: 23.3% to 27.5% (median: 26.2%) (Tables 9a, 9d, 9e)
- 7th grade: 28.3% to 41.7% (median: 37.2%) (Tables 9a, 9b, 9d, 9e)
- 8th grade: 43.5% to 51.9% (median: 48.7%)
   (Tables 9a, 9b, 9d, 9e)

Across cities, the percentage of students who ever had a drink of alcohol (other than a few sips) (i.e., lifetime alcohol use) ranged as follows:

- 6th grade: 10.8% to 40.7% (median: 28.4%) (Tables 9g–9m)
- 7th grade: 26.3% to 49.8% (median: 42.3%) (Tables 9g–9m)
- 8th grade: 35.2% to 66.1% (median: 51.1%) (Tables 9f–9m)

### Lifetime Marijuana Use

Across states, the percentage of students who ever used marijuana (i.e., lifetime marijuana use) ranged as follows:

- 6th grade: 3.7% to 5.5% (median: 5.4%) (Tables 9a, 9d, 9e)
- 7th grade: 8.5% to 11.7% (median: 9.7%) (Tables 9a, 9b, 9d, 9e)
- 8th grade: 12.7% to 21.3% (median: 17.3%) (Tables 9a, 9b, 9d, 9e)

Across cities, the percentage of students who ever used marijuana (i.e., lifetime marijuana use) ranged as follows:

- 6th grade: 2.1% to 8.4% (median: 5.4%) (Tables 9g–9m)
- 7th grade: 8.0% to 18.0% (median: 14.9%) (Tables 9g–9m)
- 8th grade: 12.9% to 38.2% (median: 21.2%)
   (Tables 9f–9m)

### Lifetime Cocaine Use

Across states, the percentage of students who ever used any form of cocaine, including powder, crack,† or freebase‡ (i.e., lifetime cocaine use), ranged as follows:

- 6th grade: 1.8% to 3.4% (median: 3.1%) (Tables 9a, 9d, 9e)
- 7th grade: 2.9% to 6.3% (median: 4.6%) (Tables 9a, 9b, 9d, 9e)
- 8th grade: 3.7% to 6.0% (median: 4.6%) (Tables 9a, 9b, 9d, 9e)

Across cities, the percentage of students who ever used any form of cocaine, including powder, crack, or freebase (i.e., lifetime cocaine use), ranged as follows:

- 6th grade: 3.0% to 7.2% (median: 3.6%) (Tables 9g–9m)
- 7th grade: 2.8% to 6.1% (median: 3.7%) (Tables 9g–9m)
- 8th grade: 2.8% to 10.4% (median: 5.3%) (Tables 9f–9m)

### Lifetime Inhalant Use

Across states, the percentage of students who ever sniffed glue, breathed the contents of spray cans, or inhaled any paints or sprays to get high (i.e., lifetime inhalant use) ranged as follows:

- 6th grade: 11.1% to 13.9% (median: 12.7%) (Tables 10a, 10d, 10e)
- 7th grade: 12.6% to 14.7% (median: 14.2%) (Tables 10a, 10b, 10d, 10e)
- 8th grade: 12.7% to 16.7% (median: 14.4%) (Tables 10a, 10b, 10d, 10e)

Across cities, the percentage of students who ever sniffed glue, breathed the contents of spray cans, or inhaled any paints or sprays to get high (i.e., lifetime inhalant use) ranged as follows:

- 6th grade: 6.4% to 13.6% (median: 8.0%) (Tables 10g–10m)
- 7th grade: 6.8% to 14.6% (median: 12.3%) (Tables 10g–10m)
- 8th grade: 5.1% to 17.2% (median: 10.2%) (Tables 10f–10m)

### Lifetime Steroid Use

Across states, the percentage of students who ever used steroids (i.e., lifetime steroid use) ranged as follows:

- 6th grade: 2.4% to 4.4% (median: 2.5%) (Tables 10a, 10d, 10e)
- 7th grade: 1.4% to 4.8% (median: 2.1%) (Tables 10a, 10b, 10d, 10e)
- 8th grade: 2.3% to 4.7% (median: 3.3%) (Tables 10a, 10b, 10d, 10e)

<sup>&</sup>lt;sup>†</sup>Pellet-sized pieces of highly purified cocaine.

<sup>&</sup>lt;sup>‡</sup> A process whereby cocaine is dissolved in ether or sodium hydroxide and the precipitate filtered off.

Across cities, the percentage of students who ever used steroids (i.e., lifetime steroid use) ranged as follows:

- 6th grade: 1.7% to 2.9% (median: 2.6%) (Tables 10g–10m)
- 7th grade: 1.6% to 3.7% (median: 2.5%) (Tables 10g–10m)
- 8th grade: 1.3% to 4.8% (median: 1.7%) (Tables 10f–10m)

### Lifetime Injection Drug Use

Across states, the percentage of students who ever used a needle to inject any illegal drug into the body (i.e., lifetime injection drug use) ranged as follows:

- 6th grade: 1.5% to 5.0% (median: 1.7%) (Tables 10a, 10d, 10e)
- 7th grade: 0.9% to 5.3% (median: 1.1%) (Tables 10a, 10b, 10d, 10e)
- 8th grade: 1.5% to 4.9% (median: 2.2%) (Tables 10a, 10b, 10d, 10e)

Across cities, the percentage of students who ever used a needle to inject any illegal drug into the body (i.e., lifetime injection drug use) ranged as follows:

- 6th grade: 0.5% to 3.3% (median: 1.3%) (Tables 10g–10m)
- 7th grade: 1.1% to 4.4% (median: 2.3%) (Tables 10g–10m)
- 8th grade: 0.9% to 2.9% (median: 1.5%) (Tables 10f–10m)

### AGE OF INITIATION OF RISK BEHAVIORS

### Cigarette Smoking Before Age 11 Years

Across states, the percentage of students who smoked a whole cigarette for the first time before age 11 years ranged as follows:

- 6th grade: 4.6% to 5.7% (median: 5.1%) (Tables 11a, 11e)
- 7th grade: 5.1% to 9.7% (median: 6.1%) (Tables 11a–11c, 11e)
- 8th grade: 6.5% to 8.6% (median: 8.0%) (Tables 11a–11c, 11e)

Across cities, the percentage of students who smoked a whole cigarette for the first time before age 11 years ranged as follows:

- 6th grade: 2.4% to 10.0% (median: 5.5%) (Tables 11g–11m)
- 7th grade: 4.6% to 8.9% (median: 6.4%) (Tables 11g–11m)
- 8th grade: 4.9% to 12.3% (median: 6.6%) (Tables 11f–11m)

### Alcohol Use Before Age 11 Years

Across states, the percentage of students who had their first drink of alcohol (other than a few sips) before age 11 years ranged as follows:

- 6th grade: 15.1% to 17.4% (median: 16.8%) (Tables 11a, 11d, 11e)
- 7th grade: 12.5% to 20.5% (median: 13.7%) (Tables 11a–11e)
- 8th grade: 12.1% to 18.7% (median: 15.1%) (Tables 11a–11e)

Across cities, the percentage of students who had their first drink of alcohol (other than a few sips) before age 11 years ranged as follows:

- 6th grade: 8.8% to 22.8% (median: 16.5%) (Tables 11g–11m)
- 7th grade: 15.5% to 20.0% (median: 18.5%) (Tables 11g–11m)
- 8th grade: 14.8% to 26.3% (median: 17.2%) (Tables 11f–11m)

### Marijuana Use Before Age 11 Years

Across states, the percentage of students who tried marijuana for the first time before age 11 years ranged as follows:

- 6th grade: 2.5% to 3.0% (median: 2.5%) (Tables 11a, 11d, 11e)
- 7th grade: 2.4% to 5.1% (median: 3.3%) (Tables 11a–11e)
- 8th grade: 2.6% to 4.5% (median: 3.8%) (Tables 11a–11e)

Across cities, the percentage of students who tried marijuana for the first time before age 11 years ranged as follows:

- 6th grade: 1.5% to 5.8% (median: 4.1%) (Tables 11g–11m)
- 7th grade: 3.5% to 6.4% (median: 5.7%) (Tables 11g–11m)
- 8th grade: 4.2% to 8.6% (median: 6.3%) (Tables 11f–11m)

## SEXUAL BEHAVIORS THAT CONTRIBUTE TO UNINTENDED PREGNANCY AND STDS, INCLUDING HIV INFECTION

#### Sexual Intercourse

Across states, the percentage of students who ever had sexual intercourse ranged as follows:

- 6th grade: 11.2% (Table 12e)
- 7th grade: 13.4% to 16.1% (median: 14.7%) (Tables 12b, 12e)
- 8th grade: 17.9% to 18.2% (median: 18.1%) (Tables 12b, 12e)

Across cities, the percentage of students who ever had sexual intercourse ranged as follows:

- 6th grade: 1.6% to 26.0% (median: 13.8%) (Tables 12g–12m)
- 7th grade: 10.7% to 32.8% (median: 19.6%) (Tables 12g–12m)
- 8th grade: 13.1% to 48.5% (median: 30.2%) (Tables 12f–12m)

### Sexual Intercourse Before Age 11 Years

Across states, the percentage of students who had sexual intercourse for the first time before age 11 years ranged as follows:

- 6th grade: 5.3% (Table 12e)
- 7th grade: 4.2% to 6.0% (median: 5.1%) (Tables 12b, 12e)
- 8th grade: 3.5% to 3.7% (median: 3.6%) (Tables 12b, 12e)

Across cities, the percentage of students who had sexual intercourse for the first time before age 11 years ranged as follows:

- 6th grade: 1.6% to 12.7% (median: 6.6%) (Tables 12g–12m)
- 7th grade: 3.7% to 12.0% (median: 7.0%) (Tables 12g–12m)
- 8th grade: 4.1% to 10.2% (median: 6.7%) (Tables 12f–12m)

### Three or More Sex Partners

Across states, the percentage of students who ever had sexual intercourse with 3 or more persons ranged as follows:

- 6th grade: 4.9% (Table 12e)
- 7th grade: 4.5% to 5.9% (median: 5.2%) (Tables 12b, 12e)
- 8th grade: 6.4% to 7.6% (median: 7.0%) (Tables 12b, 12e)

Across cities, the percentage of students who ever had sexual intercourse with 3 or more persons ranged as follows:

- 6th grade: 0.8% to 10.6% (median: 4.8%) (Tables 12g–12m)
- 7th grade: 3.8% to 14.4% (median: 7.2%) (Tables 12g–12m)
- 8th grade: 4.4% to 18.8% (median: 11.1%) (Tables 12f–12m)

### Condom Use During Last Sexual Intercourse

Across states, among students who ever had sexual intercourse, the percentage who reported either they or their partner used a condom during last sexual intercourse ranged as follows:

• 6th grade: Data not available

- 7th grade: 70.0% (Table 13e)
- 8th grade: 69.2% to 77.3% (median: 73.3%) (Tables 13b, 13e)

Across cities, among students who ever had sexual intercourse, the percentage who reported either they or their partner used a condom during last sexual intercourse ranged as follows:

- 6th grade: Data not available
- 7th grade: 62.6% to 78.5% (median: 77.2%) (Tables 13g–13i)
- 8th grade: 71.9% to 85.7% (median: 80.6%)
   (Tables 13f–13k)

## Acquired Immunodeficiency Syndrome (AIDS) or HIV Education

Across states, the percentage of students who were ever taught in school about AIDS or HIV infection ranged as follows:

- 6th grade: 41.2% to 71.7% (median: 61.3%) (Tables 13a, 13d, 13e)
- 7th grade: 65.5% to 82.5% (median: 76.3%) (Tables 13a–13e)
- 8th grade: 79.4% to 87.9% (median: 82.8%) (Tables 13a–13e)

Across cities, the percentage of students who were ever taught in school about AIDS or HIV infection ranged as follows:

- 6th grade: 35.4% to 76.4% (median: 56.8%) (Tables 13g–13m)
- 7th grade: 62.8% to 85.8% (median: 73.3%) (Tables 13g–13m)
- 8th grade: 65.3% to 86.5% (median: 83.0%) (Tables 13f–13m)

### OVERWEIGHT AND WEIGHT CONTROL

### At Risk for Becoming Overweight

Across states, the percentage of students who were at risk for becoming overweight ranged as follows:

- 6th grade: 16.2% to 19.2% (median: 17.0%) (Tables 14a, 14d, 14e)
- 7th grade: 14.3% to 16.7% (median: 16.0%) (Tables 14a–14e)
- 8th grade: 13.1% to 17.9% (median: 15.1%) (Tables 14a–14e)

Across cities, the percentage of students who were at risk for becoming overweight ranged as follows:

- 6th grade: 14.6% to 31.6% (median: 21.5%) (Tables 14g–14m)
- 7th grade: 17.1% to 27.2% (median: 19.7%) (Tables 14g–14m)
- 8th grade: 14.2% to 25.2% (median: 19.9%) (Tables 14f–14m)

### Overweight

Across states, the percentage of students who were overweight ranged as follows:

- 6th grade: 14.4% to 18.7% (median: 18.6%) (Tables 14a, 14d, 14e)
- 7th grade: 10.0% to 15.8% (median: 14.0%) (Tables 14a–14e)
- 8th grade: 8.0% to 14.9% (median: 13.0%) (Tables 14a–14e)

Across cities, the percentage of students who were overweight ranged as follows:

• 6th grade: 13.0% to 24.8% (median: 18.9%) (Tables 14g–14m)

- 7th grade: 10.5% to 22.2% (median: 13.8%) (Tables 14g–14m)
- 8th grade: 8.8% to 20.6% (median: 13.6%) (Tables 14f–14m)

### Described Themselves as Overweight

Across states, the percentage of students who described themselves as slightly or very overweight ranged as follows:

- 6th grade: 19.6% to 26.7% (median: 23.6%) (Tables 15a, 15d, 15e)
- 7th grade: 24.7% to 29.7% (median: 26.4%) (Tables 15a–15e)
- 8th grade: 24.2% to 29.7% (median: 28.9%) (Tables 15a–15e)

Across cities, the percentage of students who described themselves as slightly or very overweight ranged as follows:

- 6th grade: 16.5% to 28.6% (median: 26.3%) (Tables 15g–15m)
- 7th grade: 20.8% to 29.6% (median: 22.7%) (Tables 15g–15m)
- 8th grade: 18.8% to 27.4% (median: 26.0%) (Tables 15f–15m)

### Trying to Lose Weight

Across states, the percentage of students who were trying to lose weight ranged as follows:

- 6th grade: 40.7% to 48.4% (median: 46.8%) (Tables 15a, 15d, 15e)
- 7th grade: 42.7% to 51.9% (median: 44.2%) (Tables 15a–15e)
- 8th grade: 41.6% to 49.6% (median: 45.9%) (Tables 15a–15e)

Across cities, the percentage of students who were trying to lose weight ranged as follows:

- 6th grade: 33.9% to 52.5% (median: 44.7%) (Tables 15g–15m)
- 7th grade: 37.6% to 53.4% (median: 43.9%) (Tables 15g–15m)
- 8th grade: 35.6% to 48.7% (median: 42.5%) (Tables 15f–15m)

## Ate Less Food to Lose Weight or to Keep From Gaining Weight

Across states, the percentage of students who ever ate less food, fewer calories, or foods low in fat to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 35.0% to 47.9% (median: 41.4%) (Tables 16a, 16d, 16e)
- 7th grade: 39.1% to 47.5% (median: 41.6%) (Tables 16a, 16b, 16d, 16e)
- 8th grade: 41.1% to 47.5% (median: 46.6%) (Tables 16a, 16b, 16d, 16e)

Across cities, the percentage of students who ever ate less food, fewer calories, or foods low in fat to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 31.4% to 47.5% (median: 40.7%) (Tables 16g–16m)
- 7th grade: 40.1% to 47.7% (median: 44.5%) (Tables 16g–16m)
- 8th grade: 35.2% to 46.7% (median: 40.4%) (Tables 16f–16m)

## Exercised to Lose Weight or to Keep From Gaining Weight

Across states, the percentage of students who ever exercised to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 62.9% to 71.2% (median: 70.9%) (Tables 16a, 16d, 16e)
- 7th grade: 65.9% to 70.1% (median: 67.3%) (Tables 16a, 16b, 16d, 16e)
- 8th grade: 66.3% to 74.0% (median: 70.8%) (Tables 16a, 16b, 16d, 16e)

Across cities, the percentage of students who ever exercised to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 55.2% to 70.1% (median: 67.7%) (Tables 16g–16m)
- 7th grade: 59.3% to 73.1% (median: 68.3%) (Tables 16g–16m)
- 8th grade: 57.1% to 71.9% (median: 67.3%) (Tables 16f–16m)

### Went Without Eating for 24 Hours or More to Lose Weight or to Keep From Gaining Weight

Across states, the percentage of students who ever went without eating for at least 24 hours to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 10.0% to 19.2% (median: 15.6%) (Tables 17a, 17d, 17e)
- 7th grade: 13.9% to 18.3% (median: 16.6%) (Tables 17a, 17b, 17d, 17e)
- 8th grade: 18.1% to 21.6% (median: 19.5%) (Tables 17a, 17b, 17d, 17e)

Across cities, the percentage of students who ever went without eating for at least 24 hours to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 8.0% to 22.0% (median: 18.0%) (Tables 17g–17m)
- 7th grade: 11.6% to 23.0% (median: 19.3%) (Tables 17g–17m)
- 8th grade: 11.6% to 22.3% (median: 19.4%) (Tables 17f–17m)

## Took Diet Pills, Powders, or Liquids to Lose Weight or to Keep From Gaining Weight

Across states, the percentage of students who ever took diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 3.3% to 5.0% (median: 3.7%) (Tables 17a, 17d, 17e)
- 7th grade: 3.7% to 6.4% (median: 4.9%) (Tables 17a, 17b, 17d, 17e)
- 8th grade: 6.5% to 8.7% (median: 7.2%) (Tables 17a, 17b, 17d, 17e)

Across cities, the percentage of students who ever took diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 1.2% to 7.0% (median: 5.1%) (Tables 17g–17m)
- 7th grade: 4.5% to 6.9% (median: 5.3%) (Tables 17g–17m)
- 8th grade: 2.7% to 8.8% (median: 6.3%) (Tables 17f–17m)

## Vomited or Took Laxatives to Lose Weight or to Keep From Gaining Weight

Across states, the percentage of students who ever vomited or took laxatives to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 4.8% to 7.5% (median: 6.3%) (Tables 17a, 17d, 17e)
- 7th grade: 4.0% to 6.2% (median: 4.7%) (Tables 17a, 17b, 17d, 17e)
- 8th grade: 6.4% to 8.2% (median: 7.3%) (Tables 17a, 17b, 17d, 17e)

Across cities, the percentage of students who ever vomited or took laxatives to lose weight or to keep from gaining weight ranged as follows:

- 6th grade: 2.7% to 7.6% (median: 5.3%) (Tables 17g–17m)
- 7th grade: 5.4% to 7.8% (median: 5.6%) (Tables 17g–17m)
- 8th grade: 4.3% to 7.7% (median: 6.0%) (Tables 17f–17m)

#### PHYSICAL ACTIVITY

### Sufficient Vigorous Physical Activity

Across states, the percentage of students who exercised or participated in physical activities that made them sweat and breathe hard (e.g., basketball, soccer, running, swimming laps, fast bicycling, fast dancing, or similar aerobic activities) for 20 minutes or more on at least 3 of the 7 days preceding the survey (i.e., sufficient vigorous physical activity) ranged as follows:

- 6th grade: 67.8% to 82.1% (median: 78.2%) (Tables 18a, 18d, 18e)
- 7th grade: 72.3% to 78.0% (median: 74.1%) (Tables 18a–18e)
- 8th grade: 72.5% to 80.7% (median: 73.7%) (Tables 18a–18e)

Across cities, the percentage of students who exercised or participated in physical activities that made them sweat and breathe hard (e.g., basketball, soccer, running, swimming laps, fast bicycling, fast dancing, or similar aerobic activities) for 20 minutes or more on at least 3 of the 7 days preceding the survey (i.e., sufficient vigorous physical activity) ranged as follows:

- 6th grade: 52.5% to 71.0% (median: 67.5%) (Tables 18g–18m)
- 7th grade: 59.2% to 72.4% (median: 65.1%) (Tables 18g–18m)
- 8th grade: 58.1% to 75.8% (median: 65.5%) (Tables 18f–18m)

### Played on Sports Teams

Across states, the percentage of students who played on any sports teams run by their school or community groups ranged as follows:

- 6th grade: 49.8% to 74.2% (median: 53.7%) (Tables 18a, 18d, 18e)
- 7th grade: 50.1% to 70.8% (median: 62.1%) (Tables 18a, 18b, 18d, 18e)
- 8th grade: 53.8% to 69.9% (median: 63.0%) (Tables 18a, 18b, 18d, 18e)

Across cities, the percentage of students who played on any sports teams run by their school or community groups ranged as follows:

- 6th grade: 37.8% to 54.6% (median: 47.7%) (Tables 18g–18m)
- 7th grade: 38.4% to 50.2% (median: 48.2%) (Tables 18g–18m)
- 8th grade: 41.2% to 51.2% (median: 45.0%) (Tables 18f–18m)

### Watched Television

Across states, the percentage of students who watched television 3 or more hours per day on an average school day ranged as follows:

- 6th grade: 28.4% to 48.7% (median: 48.1%) (Tables 18a, 18d, 18e)
- 7th grade: 30.1% to 49.2% (median: 34.4%) (Tables 18a–18e)
- 8th grade: 28.2% to 56.6% (median: 31.3%) (Tables 18a–18e)

Across cities, the percentage of students who watched television 3 or more hours per day on an average school day ranged as follows:

- 6th grade: 32.3% to 68.6% (median: 54.0%) (Tables 18g–18m)
- 7th grade: 39.4% to 67.0% (median: 54.5%) (Tables 18g–18m)
- 8th grade: 51.1% to 72.2% (median: 60.3%) (Tables 18f–18m)

### **Attended Physical Education Class**

Across states, the percentage of students who attended physical education (PE) classes on 1 or more days in an average week when they were in school (i.e., enrolled in PE class) ranged as follows:

- 6th grade: 64.5% to 89.1% (median: 71.8%) (Tables 19a, 19d, 19e)
- 7th grade: 62.7% to 88.2% (median: 80.8%) (Tables 19a–19e)
- 8th grade: 50.2% to 91.9% (median: 80.5%) (Tables 19a–19e)

Across cities, the percentage of students who attended PE classes on 1 or more days in an average week when they were in school (i.e., enrolled in PE class) ranged as follows:

- 6th grade: 37.9% to 95.0% (median: 67.4%) (Tables 19g–19m)
- 7th grade: 39.8% to 95.5% (median: 74.4%) (Tables 19g–19m)
- 8th grade: 38.9% to 96.6% (median: 70.0%) (Tables 19f–19m)

### Attended PE Class Daily

Across states, the percentage of students who attended PE classes on 5 days in an average week when they were in school (i.e., attended PE class daily) ranged as follows:

- 6th grade: 31.8% to 56.8% (median: 43.1%) (Tables 19a, 19d, 19e)
- 7th grade: 9.0% to 43.4% (median: 32.1%) (Tables 19a–19e)
- 8th grade: 6.9% to 49.1% (median: 37.7%) (Tables 19a–19e)

Across cities, the percentage of students who attended PE classes on 5 days in an average week when they were in school (i.e., attended PE class daily) ranged as follows:

- 6th grade: 14.1% to 84.2% (median: 26.5%) (Tables 19g–19m)
- 7th grade: 11.8% to 79.7% (median: 40.8%) (Tables 19g–19m)
- 8th grade: 12.2% to 86.5% (median: 47.2%) (Tables 19f–19m)

### GENERAL HEALTH

### Described Health as Fair or Poor

Across states, the percentage of students who described their health, in general, as fair or poor ranged as follows:

- 6th grade: 6.6% to 8.9% (median: 7.0%) (Tables 20a, 20d, 20e)
- 7th grade: 6.7% to 10.8% (median: 10.3%) (Tables 20a, 20d, 20e)
- 8th grade: 5.7% to 10.3% (median: 6.7%) (Tables 20a, 20d, 20e)

Across cities, the percentage of students who described their health, in general, as fair or poor ranged as follows:

- 6th grade: 4.9% to 10.1% (median: 6.7%) (Tables 20g–201)
- 7th grade: 6.2% to 10.3% (median: 7.6%) (Tables 20g–201)
- 8th grade: 5.7% to 10.3% (median: 7.7%) (Tables 20g–201)

### DISCUSSION

Too many middle school students engage in behaviors that place them at risk for death, disability, and social problems. Risk behaviors associated with unintentional injuries and violence, tobacco, alcohol and other drug use, HIV infection and other STDs, unintended pregnancy, physical inactivity, and overweight are prevalent among some middle school students.

Certain risk behaviors are more likely to occur among some subpopulations of students defined by sex, race/ ethnicity, and grade. However, because the YRBS does not include measures of socioeconomic status (SES) or culture, YRBS data cannot be used to isolate these factors from the effects of sex, race/ethnicity, or grade on risk behaviors with substantial disparities. In a 1992 national study, after controlling for age, sex, race/ethnicity, and school enrollment status (in or out of school), adolescents aged 12–17 years were less likely to report selected risk behaviors (e.g., smoking, physical inactivity, eating too little fruit and vegetables, episodic heavy drinking) as SES (education or family income) of the responsible adult increased. Additional research is needed to assess the effect of specific educational, socioeconomic, cultural, and racial/ethnic factors on the prevalence of health-risk behaviors among middle school students.

### VARIATION ACROSS STATES AND CITIES

For the majority of risk behaviors, prevalence varies little from state to state and from city to city. However, across state surveys, a range of 25 or more percentage points or a fivefold variation or greater was identified for the following risk behaviors:

### **6TH GRADE**

- Current frequent cigarette use (minimum: 0.1%; maximum: 1.5%).
- Taught about AIDS or HIV infection in school (minimum: 41.2%; maximum: 71.7%).
- Attended PE class daily (minimum: 31.8%; maximum: 56.8%).

### 7TH GRADE

- Rarely or never wore a bicycle helmet (minimum: 46.4%; maximum: 86.1%).
- Rarely or never wore a helmet when rollerblading or riding a skateboard (minimum: 57.2%; maximum: 82.3%).
- Lifetime injection drug use (minimum: 0.9%; maximum: 5.3%).
- Attended PE class (minimum: 62.7%; maximum: 88.2%).
- Attended PE class daily (minimum: 9.0%; maximum: 43.4%).

#### 8TH GRADE

- Rarely or never wore a bicycle helmet (minimum: 54.2%; maximum: 89.6%).
- Watched television at least 3 hours per day (minimum: 28.2%; maximum: 56.6%).
- Attended PE class (minimum: 50.2%; maximum: 91.9%).
- Attended PE class daily (minimum: 6.9%; maximum: 49.1%).

Across local surveys, a range of 25 or more percentage points or a fivefold variation or greater was identified for the following risk behaviors:

### **6TH GRADE**

- Rarely or never wore a seat belt when riding in a car (minimum: 3.3%; maximum: 18.6%).
- Rarely or never wore a bicycle helmet (minimum: 39.8%; maximum: 85.1%).
- Rarely or never wore a helmet when rollerblading or riding a skateboard (minimum: 35.6%; maximum: 89.3%).
- Ever been in a physical fight (minimum: 47.4%; maximum: 73.1%).
- Current frequent cigarette use (minimum: 0.0%; maximum: 1.4%).
- Lifetime alcohol use (minimum: 10.8%; maximum: 40.7%).
- Lifetime injection drug use (minimum: 0.5%; maximum: 3.3%).
- Ever had sexual intercourse (minimum: 1.6%; maximum: 26.0%).
- Had sexual intercourse before age 11 years (minimum: 1.6%; maximum: 12.7%).
- Had sexual intercourse with 3 or more persons (minimum: 0.8%; maximum: 10.6%).
- Taught about AIDS or HIV infection in school (minimum: 35.4%; maximum: 76.4%).
- Ever took diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight (minimum: 1.2%; maximum: 7.0%).
- Watched television at least 3 hours per day (minimum: 32.3%; maximum: 68.6%).

- Attended PE class (minimum: 37.9%; maximum: 95.0%).
- Attended PE class daily (minimum: 14.1%; maximum: 84.2%).

### 7TH GRADE

- Rarely or never wore a bicycle helmet (minimum: 53.3%; maximum: 92.1%).
- Rarely or never wore a helmet when rollerblading or riding a skateboard (minimum: 55.2%; maximum: 91.3%).
- Current frequent cigarette use (minimum: 0.0%; maximum: 3.5%).
- Watched television at least 3 hours per day (minimum: 39.4%; maximum: 67.0%).
- Attended PE class (minimum: 39.8%; maximum: 95.5%).
- Attended PE class daily (minimum: 11.8%; maximum: 79.7%).

### 8TH GRADE

- Rode with a driver who had been drinking alcohol (minimum: 26.1%; maximum: 54.5%).
- Rarely or never wore a bicycle helmet (minimum: 61.2%; maximum: 96.0%).
- Rarely or never wore a helmet when rollerblading or riding a skateboard (minimum: 60.4%; maximum: 93.3%).
- Lifetime cigarette use (minimum: 24.8%; maximum: 54.6%).
- Current frequent cigarette use (minimum: 0.6%; maximum: 3.4%).
- Lifetime alcohol use (minimum: 35.2%; maximum: 66.1%).
- Lifetime marijuana use (minimum: 12.9%; maximum: 38.2%).

- Ever had sexual intercourse (minimum: 13.1%; maximum: 48.5%).
- Attended PE class (minimum: 38.9%; maximum: 96.6%).
- Attended PE class daily (minimum: 12.2%; maximum: 86.5%).

These variations may occur in part because of differences in state and local laws and policies, enforcement practices, availability of effective interventions, prevailing behavioral norms, demographic characteristics of the population, and observed adult behavior. Longitudinal research is needed to better understand the effect of these factors on the prevalence of risk behaviors.

The National Youth Tobacco Survey (NYTS) and the Monitoring the Future (MTF) survey provide nationally representative data on select health-risk behaviors among middle school students. 10,11 The NYTS middle school data provide prevalence estimates on tobacco use among students in grades 6-8. Four states (Georgia, Maine, North Dakota, and Wyoming) with weighted 2005 YRBS middle school data asked tobacco questions. Across these four states, the median percentage of all students who reported current cigarette use (YRBS state median: 8.1%; NYTS: 8.4%) was similar to the prevalence estimate from the 2004 NYTS middle school students. Across the same four states, the median percentage of students who reported current smokeless tobacco use (YRBS state median: 5.1%; NYTS: 2.8%) was somewhat higher than the prevalence estimate from the 2004 NYTS middle school students. Across three states (Georgia, Maine, and North Dakota), the median percentages of students who reported current cigar use (YRBS state median: 4.9%; NYTS: 5.3%) and any current

tobacco use (YRBS\\$ state median: 10.6%; NYTS\*\*: 11.8%) were similar to the prevalence estimates from the 2004 NYTS middle school students.

MTF middle school data provide prevalence estimates on tobacco, alcohol, and other drug use among students in 8th grade. Across the four states (Georgia, Maine, North Dakota, and Wyoming) with weighted 2005 YRBS middle school data that asked tobacco questions, the median percentage of 8th grade students who reported lifetime cigarette use (YRBS state median: 37.3%; MTF: 25.9%) was somewhat higher than the prevalence estimate from the MTF survey among 8th grade students. Across the same four states, the median percentage of 8th grade students who reported current cigarette use (YRBS state median: 10.7%; MTF: 9.3%) was similar to the prevalence estimate from the MTF survey among 8th grade students, while the median percentage of 8th grade students who reported current smokeless tobacco use (YRBS state median: 6.5%; MTF: 3.3%) was somewhat higher than the prevalence estimate from the MTF survey among 8th grade students.

Four states (Georgia, Maine, South Carolina, and Wyoming) with weighted 2005 YRBS middle school data asked the alcohol and other drug use questions. Across these four states, the median percentage of 8th grade students who reported lifetime alcohol use (YRBS state median: 48.7%; MTF: 41.0%) was somewhat higher than the prevalence estimate from the MTF survey among 8th grade students. Across the same four states, the median percentages of 8th grade students who reported lifetime marijuana use (YRBS state median: 17.3%; MTF: 16.5%) and lifetime cocaine use (YRBS state median: 4.6%; MTF: 3.7%) were similar to the prevalence estimates from the MTF survey among 8th grade students, while the median percentage of 8th grade students who reported lifetime inhalant use was somewhat lower than the prevalence estimate from the MTF survey among 8th grade students (YRBS state median: 14.4%; MTF: 17.1%).

<sup>&</sup>lt;sup>§</sup>Smoked cigarettes or cigars or used chewing tobacco, snuff, or dip on ≥ 1 of the 30 days preceding the survey.

<sup>&</sup>quot;Smoked cigarettes, cigars, smokeless tobacco, pipes, bidis (leafwrapped, flavored cigarettes from India), or kreteks (clove cigarettes).

### LIMITATIONS

The findings in this report are subject to multiple limitations. First, these data apply only to young people who attend grades 6, 7, or 8 in regular public schools. Students who attend private or alternative schools and students who are homeschooled are not included; therefore, the data are not representative of all youth in

this age group. 12 Second, the extent of underreporting or overreporting of behaviors cannot be determined, although a recent preliminary study suggests the test-retest reliability of questions on the middle school YRBS questionnaire is high. 13 Third, BMI is calculated on the basis of self-reported height and weight and, therefore, tends to underestimate the prevalence of overweight and risk for overweight. 14

### CONCLUSION

## USES OF MIDDLE SCHOOL YOUTH RISK BEHAVIOR SURVEY DATA

State and local agencies and nongovernmental organizations use middle school YRBS data to support modifications to curricula and programs, as well as to support legislation or new initiatives that promote health. For example, Memphis City Schools used their 2005 middle school and high school YRBS results to develop a "Healthy Choice Initiative Tool Kit" that is distributed to teachers, pediatricians, parent groups, school counselors, school nurses, faith-based organizations, and community-based organizations. The information and resources included in the kit are intended to encourage discussion with young people about risk behaviors and their consequences.

Milwaukee Public Schools decided to implement only evidence-based curricula for certain health topics in response to their middle school YRBS results. In Wyoming, teachers in grades 6–12 were provided with YRBS data and encouraged to integrate those data into health instruction. Other state and local agencies use their data in support of policy development and as evidence in grant applications, needs assessments, program rationales, and program evaluations. Many state and local agencies post their YRBS data on their Web sites to encourage and facilitate use of their data by community agencies. Continued implementation of the YRBSS will help monitor and ensure the effectiveness of public health and school health programs for young people.

## APPENDIX

2005 MIDDLE SCHOOL YOUTH RISK BEHAVIOR SURVEY

# 2005 MIDDLE SCHOOL YOUTH RISK BEHAVIOR SURVEY QUESTIONNAIRE

This survey is about health behavior. It has been developed so you can tell us what you do that may affect your health. The information you give will be used to develop better health education for young people like yourself.

DO NOT write your name on this survey. The answers you give will be kept private. No one will know what you write. Answer the questions based on what you really do.

Completing the survey is voluntary. Whether or not you answer the questions will not affect your grade in this class. If you are not comfortable answering a question, just leave it blank.

The questions that ask about your background will be used only to describe the types of students completing this survey. The information will not be used to find out your name. No names will ever be reported.

Make sure to read every question. Fill in the ovals completely. When you are finished, follow the instructions of the person giving you the survey.

Thank you very much for your help.

#### DIRECTIONS

- Use a #2 pencil only.
- Make dark marks.
- Fill in a response like this: (A) (B) (C).
- To change your answer, erase completely.
- 1. How old are you?
  - A. 10 years old or younger
  - B. 11 years old
  - C. 12 years old
  - D. 13 years old
  - E. 14 years old
  - F. 15 years old
  - G. 16 years old or older
- 2. What is your sex?
  - A. Female
  - B. Male
- 3. In what grade are you?
  - A. 6th grade
  - B. 7th grade
  - C. 8th grade
  - D. Other
- 4. How do you describe yourself? (Select one or more responses.)
  - A. American Indian or Alaska Native
  - B. Asian
  - C. Black or African American
  - D. Hispanic or Latino
  - E. Native Hawaiian or Other Pacific Islander
  - F. White

- 5. How do you describe your health in general?
  - A. Excellent
  - B. Very good
  - C. Good
  - D. Fair
  - E. Poor
- 6. How tall are you without your shoes on?

**Directions:** Write your height in the shaded blank boxes on your answer sheet. Fill in the matching oval below each number.

#### Example

He	Height					
Feet	Inches					
5	7					
3	0					
4	1					
(5)	2					
6	3					
7	4					
	(5)					
	6					
,	7					
	8					
	9					
	10					
	11)					

7. How much do you weigh without your shoes on?

Directions: Write your weight in the shaded blank boxes on your answer sheet. Fill in the matching oval below each number.

Example

Weight							
	Pounds						
0	0	0					
1	1	1					
2	2	2					
3	3	3					
	4	4					
	(5)	(5)					
	6	6					
	7	7					
	8	8					
	9	9					

The next 7 questions ask about personal safety and violence-related behaviors.

- 8. How often do you wear a seat belt when riding in a car?
  - A. Never
  - B. Rarely
  - C. Sometimes
  - D. Most of the time
  - E. Always

- 9. When you ride a bicycle, how often do you wear a helmet?
  - A. I do not ride a bicycle
  - B. Never wear a helmet
  - C. Rarely wear a helmet
  - D. Sometimes wear a helmet
  - E. Most of the time wear a helmet
  - F. Always wear a helmet
- 10. When you rollerblade or ride a skateboard, how often do you wear a helmet?
  - A. I do not rollerblade or ride a skateboard
  - B. Never wear a helmet
  - C. Rarely wear a helmet
  - D. Sometimes wear a helmet
  - E. Most of the time wear a helmet
  - F. Always wear a helmet

- 12. Have you ever carried a weapon, such as a gun, knife, or club?
  - A. Yes
  - B. No
- 13. Have you ever been in a physical fight?
  - A. Yes
  - B. No

- 14. Have you ever been in a physical fight in which you were hurt and had to be treated by a doctor or nurse?
  - A. Yes
  - B. No

The next 3 questions ask about attempted suicide. Sometimes people feel so depressed about the future that they may consider attempting suicide or killing themselves.

- 15. Have you ever **seriously** thought about killing yourself?
  - A. Yes
  - B. No
- 16. Have you ever made a **plan** about how you would kill yourself?
  - A. Yes
  - B. No
- 17. Have you ever **tried** to kill yourself?
  - A. Yes
  - B. No

The next 8 questions ask about tobacco use.

- 18. Have you ever tried cigarette smoking, even one or two puffs?
  - A. Yes
  - B. No

- 19. How old were you when you smoked a whole cigarette for the first time?
  - A. I have never smoked a whole cigarette
  - B. 8 years old or younger
  - C. 9 years old
  - D. 10 years old
  - E. 11 years old
  - F. 12 years old
  - G. 13 years old
  - H. 14 years old or older
- 20. **During the past 30 days,** on how many days did you smoke cigarettes?
  - A. 0 days
  - B. 1 or 2 days
  - C. 3 to 5 days
  - D. 6 to 9 days
  - E. 10 to 19 days
  - F. 20 to 29 days
  - G. All 30 days
- 21. **During the past 30 days,** on the days you smoked, how many cigarettes did you smoke **per day?** 
  - A. I did not smoke cigarettes during the past 30 days
  - B. Less than 1 cigarette per day
  - C. 1 cigarette per day
  - D. 2 to 5 cigarettes per day
  - E. 6 to 10 cigarettes per day
  - F. 11 to 20 cigarettes per day
  - G. More than 20 cigarettes per day

- 22. **During the past 30 days,** how did you **usually** get your own cigarettes? (Select only **one** response.)
  - A. I did not smoke cigarettes during the past 30 days
  - B. I bought them in a store such as a convenience store, supermarket, discount store, or gas station
  - C. I bought them from a vending machine
  - D. I gave someone else money to buy them for me
  - E. I borrowed (or bummed) them from someone else
  - F. A person 18 years old or older gave them to me
  - G. I took them from a store or family member
  - H. I got them some other way
- 23. Have you ever smoked cigarettes daily, that is, at least one cigarette every day for 30 days?
  - A. Yes
  - B. No
- 24. **During the past 30 days,** on how many days did you use **chewing tobacco, snuff, or dip,** such as Redman, Levi Garrett, Beechnut, Skoal, Skoal Bandits, or Copenhagen?
  - A. 0 days
  - B. 1 or 2 days

  - D. 6 to 9 days
  - E. 10 to 19 days
  - F. 20 to 29 days
  - G. All 30 days

- 25. **During the past 30 days,** on how many days did you smoke **cigars, cigarillos, or little cigars?** 
  - A. 0 days
  - B. 1 or 2 days
  - C. 3 to 5 days
  - D. 6 to 9 days
  - E. 10 to 19 days
  - F. 20 to 29 days
  - G. All 30 days

The next 2 questions ask about drinking alcohol. This includes drinking beer, wine, wine coolers, and liquor such as rum, gin, vodka, or whiskey. For these questions, drinking alcohol does <u>not</u> include drinking a few sips of wine for religious purposes.

- 26. Have you ever had a drink of alcohol, other than a few sips?
  - A. Yes
  - B. No
- 27. How old were you when you had your first drink of alcohol other than a few sips?
  - A. I have never had a drink of alcohol other than a few sips
  - B. 8 years old or younger
  - C. 9 years old
  - D. 10 years old
  - E. 11 years old
  - F. 12 years old
  - G. 13 years old
  - H. 14 years old or older

### The next 2 questions ask about marijuana use. Marijuana also is called grass or pot.

- 28. Have you ever used marijuana?
  - A. Yes
  - B. No
- 29. How old were you when you tried marijuana for the first time?
  - A. I have never tried marijuana
  - B. 8 years old or younger
  - C. 9 years old
  - D. 10 years old
  - E. 11 years old
  - F. 12 years old
  - G. 13 years old
  - H. 14 years old or older

#### The next 4 questions ask about other drug use.

- 30. Have you ever used **any** form of cocaine, including powder, crack, or freebase?
  - A. Yes
  - B. No
- 31. Have you ever sniffed glue, or breathed the contents of spray cans, or inhaled any paints or sprays to get high?
  - A. Yes
  - B. No

- 32. Have you ever used steroids?
  - A. Yes
  - B. No
- 33. Have you ever used a needle to inject any **illegal** drug into your body?
  - A. Yes
  - B. No

#### The next 4 questions ask about sexual intercourse.

- 34. Have you ever had sexual intercourse?
  - A. Yes
  - B. No
- 35. How old were you when you had sexual intercourse for the first time?
  - A. I have never had sexual intercourse
  - B. 8 years old or younger
  - C. 9 years old
  - D. 10 years old
  - E. 11 years old
  - F. 12 years old
  - G. 13 years old
  - H. 14 years old or older

- 36. With how many people have you ever had sexual intercourse?
  - A. I have never had sexual intercourse
  - B. 1 person
  - C. 2 people
  - D. 3 people
  - E. 4 or more people
- 37. The **last time** you had sexual intercourse, did you or your partner use a condom?
  - A. I have never had sexual intercourse
  - B. Yes
  - C. No

#### The next 7 questions ask about body weight.

- 38. How do you describe your weight?
  - A. Very underweight
  - B. Slightly underweight
  - C. About the right weight
  - D. Slightly overweight
  - E. Very overweight
- 39. Which of the following are you trying to do about your weight?
  - A. Lose weight
  - B. Gain weight
  - C. Stay the same weight
  - D. I am **not trying to do anything** about my weight

- 40. Have you ever **exercised** to lose weight or to keep from gaining weight?
  - A. Yes
  - B. No
- 41. Have you ever **eaten less food, fewer calories, or foods low in fat** to lose weight or to keep from gaining weight?
  - A. Yes
  - B. No
- 42. Have you ever **gone without eating for 24 hours or more** (also called fasting) to lose weight or to keep from gaining weight?
  - A. Yes
  - B. No
- 43. Have you ever taken any diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight? (Do not include meal replacement products such as Slim Fast.)
  - A. Yes
  - B. No
- 44. Have you ever **vomited or taken laxatives** to lose weight or to keep from gaining weight?
  - A. Yes
  - B. No

#### The next 4 questions ask about physical activity.

- 45. On how many of the past 7 days did you exercise or participate in physical activity for at least 20 minutes that made you sweat and breathe hard, such as basketball, soccer, running, swimming laps, fast bicycling, fast dancing, or similar aerobic activities?
  - A. 0 days
  - B. 1 day
  - C. 2 days
  - D. 3 days
  - E. 4 days
  - F. 5 days
  - G. 6 days
  - H. 7 days
- 46. On an average school day, how many hours do you watch TV?
  - A. I do not watch TV on an average school day
  - B. Less than 1 hour per day
  - C. 1 hour per day
  - D. 2 hours per day
  - E. 3 hours per day
  - F. 4 hours per day
  - G. 5 or more hours per day

- 47. **In an average week** when you are in school, on how many days do you go to physical education (PE) classes?
  - A. 0 days
  - B. 1 day
  - C. 2 days
  - D. 3 days
  - E. 4 days
  - F. 5 days
- 48. Do you play on any sports teams? (Include any teams run by your school or community groups.)
  - A. Yes
  - B. No

#### The next question asks about AIDS education.

- 49. Have you ever been taught about AIDS or HIV infection in school?
  - A. Yes
  - B. No
  - C. Not sure

This is the end of the survey.

Thank you very much for your help.
